## ION MAGNETUM ELECTRO MEDICAL FITNESS

### REGENERATIVE ELECTRO MEDICINE

 <b>CE</b> (CE-2484)		<b>ISO 9001:2015</b> (UQ - 9110)
----------------------------	--	-------------------------------------

**Committed to fitness. The easy way!**

## **MOST EXCITING DEVELOPMENT OF THE CENTURY IN THE REGENATIVE ELECTRO MEDICINE**

It is first of its kind. It is noninvasive system and technology that produces thousands of Bio Electro-Magnetic Resonant (EMR) waveforms. These waveforms bunched and interwind to make a complex sine square waveform. The square waveform is loaded on a presettable carrier frequency for delivery to the human body. These EMRs use ION Channels as means of communication within the body. That is they act as messengers. The EMR waveforms stimulate and strengthen L-fields of the body. The cumulative effect of it spreads seamlessly across the body including bone marrow thereby opening the gates for biologists to bypass the need to create specialized STEMCELLS offering PHARMACEUTICAL FREE TREATMENTS and rejuvenate cells, organs and whole body.

In principal age and disease has no direct relation.

## ORGANIZING POWER OF MAGNET

The power of the magnet is one of the most basic powers in nature. We know that magnetism itself was an ingredient in the primordial soup from which the universe and our planet came forth. Magnetism is the force that keeps order in the galaxy, allowing stars and planets to spin at significant velocities. And in a sense, our own planet's magnetic field is responsible for protecting all life on earth.

Together, electromagnetic field and energies interact in many complex ways, that have given rise to much of the natural world, not to mention the whole technology of electronics (Body Electric P. 81)

## 6<sup>TH</sup> ELEMENT

It is known that for the survival of living organisms FIVE Elements (panch maha bhutas) are required viz.,

- Earth,
- Water,
- Fire,
- Air
- Aether.

However, the most important 6<sup>th</sup> Element of life “Magnetism” was not known to us till the research of L-Fields (Life Fields) theory was published by Dr. Harold Saxton Burr. L-Fields are the basic blue prints of all life on this planet, and offer dramatic evidence of the part played by L-Fields in biology.

L-Fields are responsible to maintain the shape of organs and whole body irrespective of the fact that, cells are continuously replaced and almost all cells in the body are replaced within the span of seven years.

## ION MAGNETUM

ION MAGNETUM Technology uses: -

- (i) IONS for its specialization to carry messages in the body, and
- (ii) MAGNETIC forces for repairs and rejuvenation of cells, organs and whole body.

Any flow of electrons set-up a combined electric and magnetic field around the current which in turn effects other electronics nearby.

The magnetic fields are produced in-situ within the body as HALL effect. All the organs in the body has its own matrix of bio magnetic field. If the magnetic field of the organ is depleted the performance of the organ gets compromised. These bio magnetic fields are in synchronization of earth magnetic field. Earth magnetic fields are pulsating magnetic fields and radiates thousands of geomagnetic frequencies within the spectrum of "shumann frequencies". The ION MAGNETUM Machine produces thousands of bio-magnetic sympathetic resonating fields in the body and force various organs and systems back within their normal parameters tending to change the focus of medicine from pharmaceutical oriented model to technological cur-oriented model.

The effect of magnetic forces on water is well known as the lunar effect. The human body contains 70%, 80% of water. Hence the effect of bio-magnetic fields on the body is obvious.

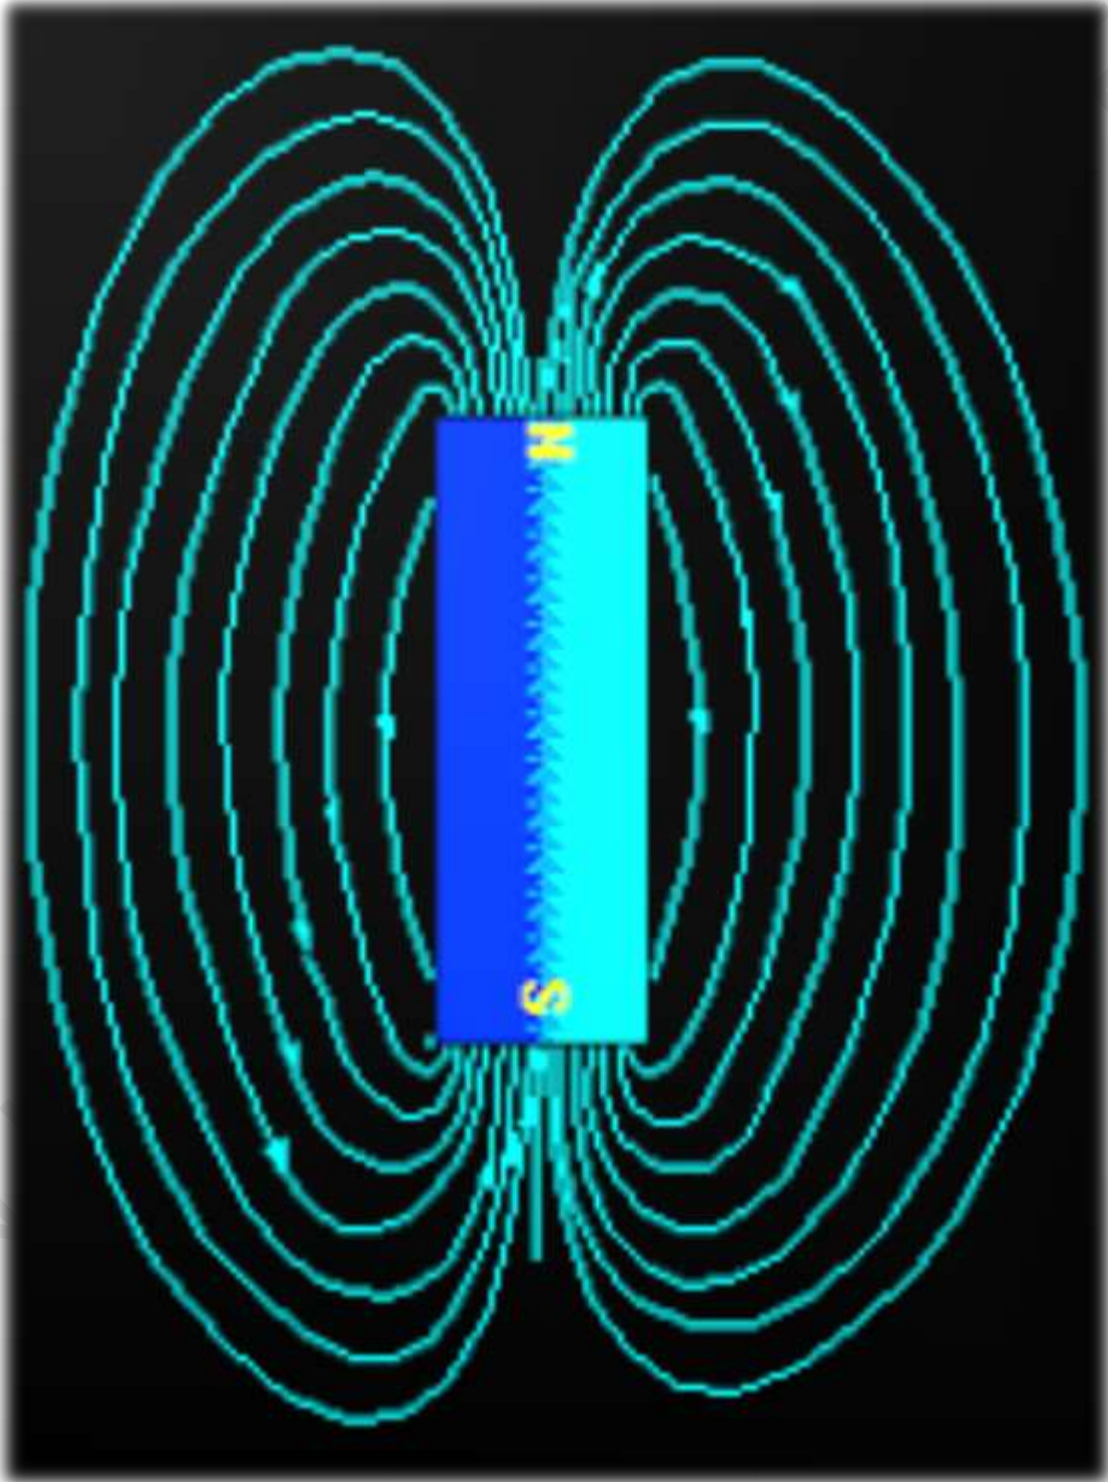

Both electric and magnetic fields are really just abstractions that scientists have made up to try and understand electricity's and magnetism's action at a distance, produced by no known intervening material or energy, a phenomenon that used to be considered impossible until it became undeniable. A field is represented by lines of force, another abstraction, to indicate its direction and shape. Both kinds of field decline with distance, but their influence is technically infinite. Every time you use your toaster, the fields around it perturb charged particles in the farthest galaxies even so slightly.

Angiogenesis research (seen with doppler studies) shows how PEMF helps with the formation of new blood vessels and improved microcirculation at the capillary level. Angiogenesis is the physiological process involving the growth of new blood vessels from pre-existing vessels. This is one of the most exciting facets of PEMF research, because improved circulation lies at the heart of healing, regeneration, nutrient delivery, detoxification and our overall health

ION

ED

## OBESITY IS NOT AN INDEPENDENT ENTITY

If the person is FIT, he cannot be OBESE.

To tackle the OBESITY the person has to be FIT first.

If OBESITY is tackled in isolation, the fat loss will be temporary and the person will regain the weight eventually with vengeance. It will also have undesirable and sometimes irreversible side effects like, anemia, loss of immunity, vitamin deficiencies, lethargy, lack of energy, prone to diseases etc.

ION MAGNETUM MACHINE is a VIRTUAL Exercise Machine.

ION MAGNETUM is holistic treatment, it aims at FITNESS and OVERALL HEALTH.

ION MAGNETUM therapy supports and stimulates the body's ability to heal itself.

**Weight and inch loss are byproducts.**

## FITNESS IS THE KEY

ION MAGNETUM treatment accompanied with lifestyle changes and moderate exercise routine offers sustainable weight loss and FIT body.

The market is flooded with weight loss clinics. None has scientific program of weight loss. Some prescribe dieting (type of starvation), some offer powders which shows drastic weight reduction by loss of body fluids. Some offers electrical stimulator, which brings weight reduction by loss of muscle mass. NONE reduces fat. ION MAGNETUM is the only technology which tackles fat including visceral fat. PLEASE read more about the ION MAGNETUM technology and you will be surprised to know the **numerous** benefits your body will get from the technology.

We stay ahead, so you  
stay fit and smart.

# The 10 Fattest Countries in the World

The number of overweight people has skyrocketed over the past thirty years, jumping from 857 million in 1980 to more than 2 billion in 2013. That's approximately a third of the world's population. In 2010 alone, between 3 and 4 million people died due to complications from obesity. A new study out in *The Lancet* by the Global Burden of Disease has revealed the 10 countries with the highest rates of obesity. A few may surprise you.

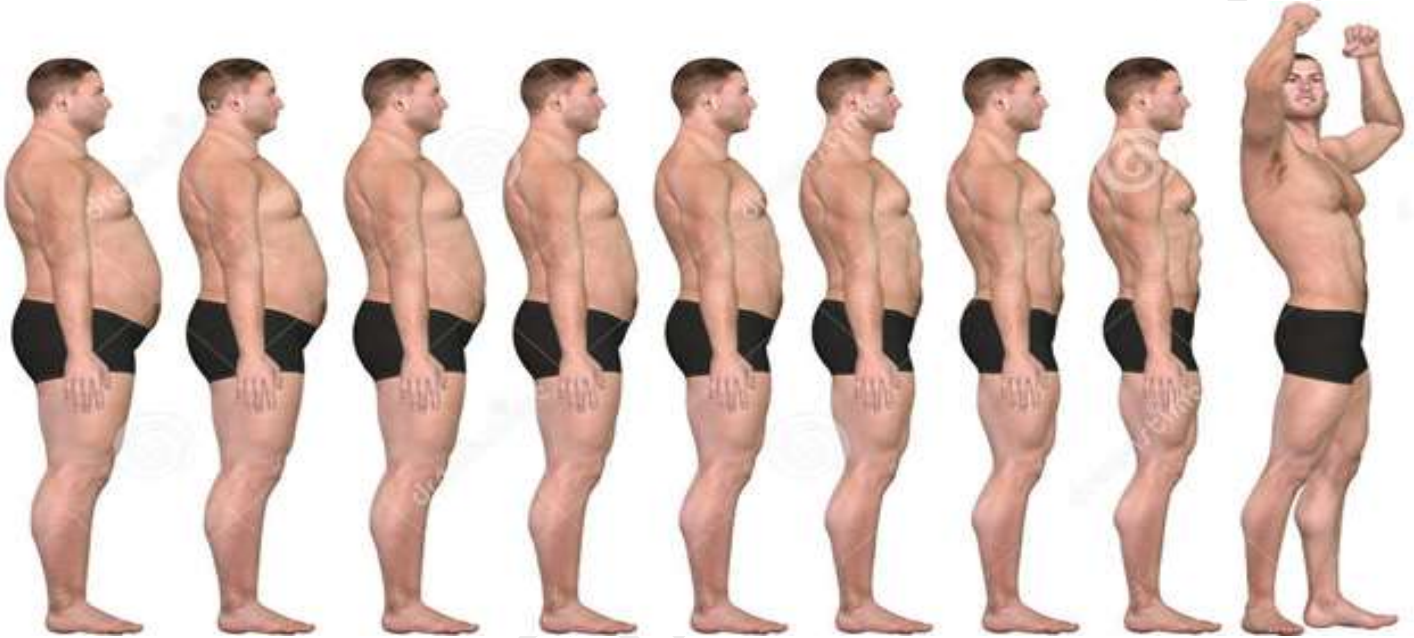

Rank	Country	Overweight Population	Percentage of Adult Population
1	UNITED STATES:	<b>78 MILLION</b>	people, or 33% of the adult population
2	CHINA:	<b>46 million</b>	people, or 4.4%
3	INDIA:	<b>30 million</b>	people, or 3.8%
4	RUSSIA:	<b>28 million</b>	people or 24.1%
5	BRAZIL:	<b>22 million</b>	or 16.2%
6	MEXICO:	<b>20 million</b>	or 26.9%
7	EGYPT:	<b>18 million</b>	or 35.9%
8	GERMANY:	<b>16 million</b>	or 24.3%
9	PAKISTAN:	<b>14 million</b>	or 13.6%
10	INDONESIA:	<b>11 million</b>	or 6.8%

**FAT TO FIT**

**IF YOU HAVE THE WILL, WE HAVE THE WAY**

**BUILD PERFECT BODY BY TECHNOLOGY**

ION LIFE SCIENCES

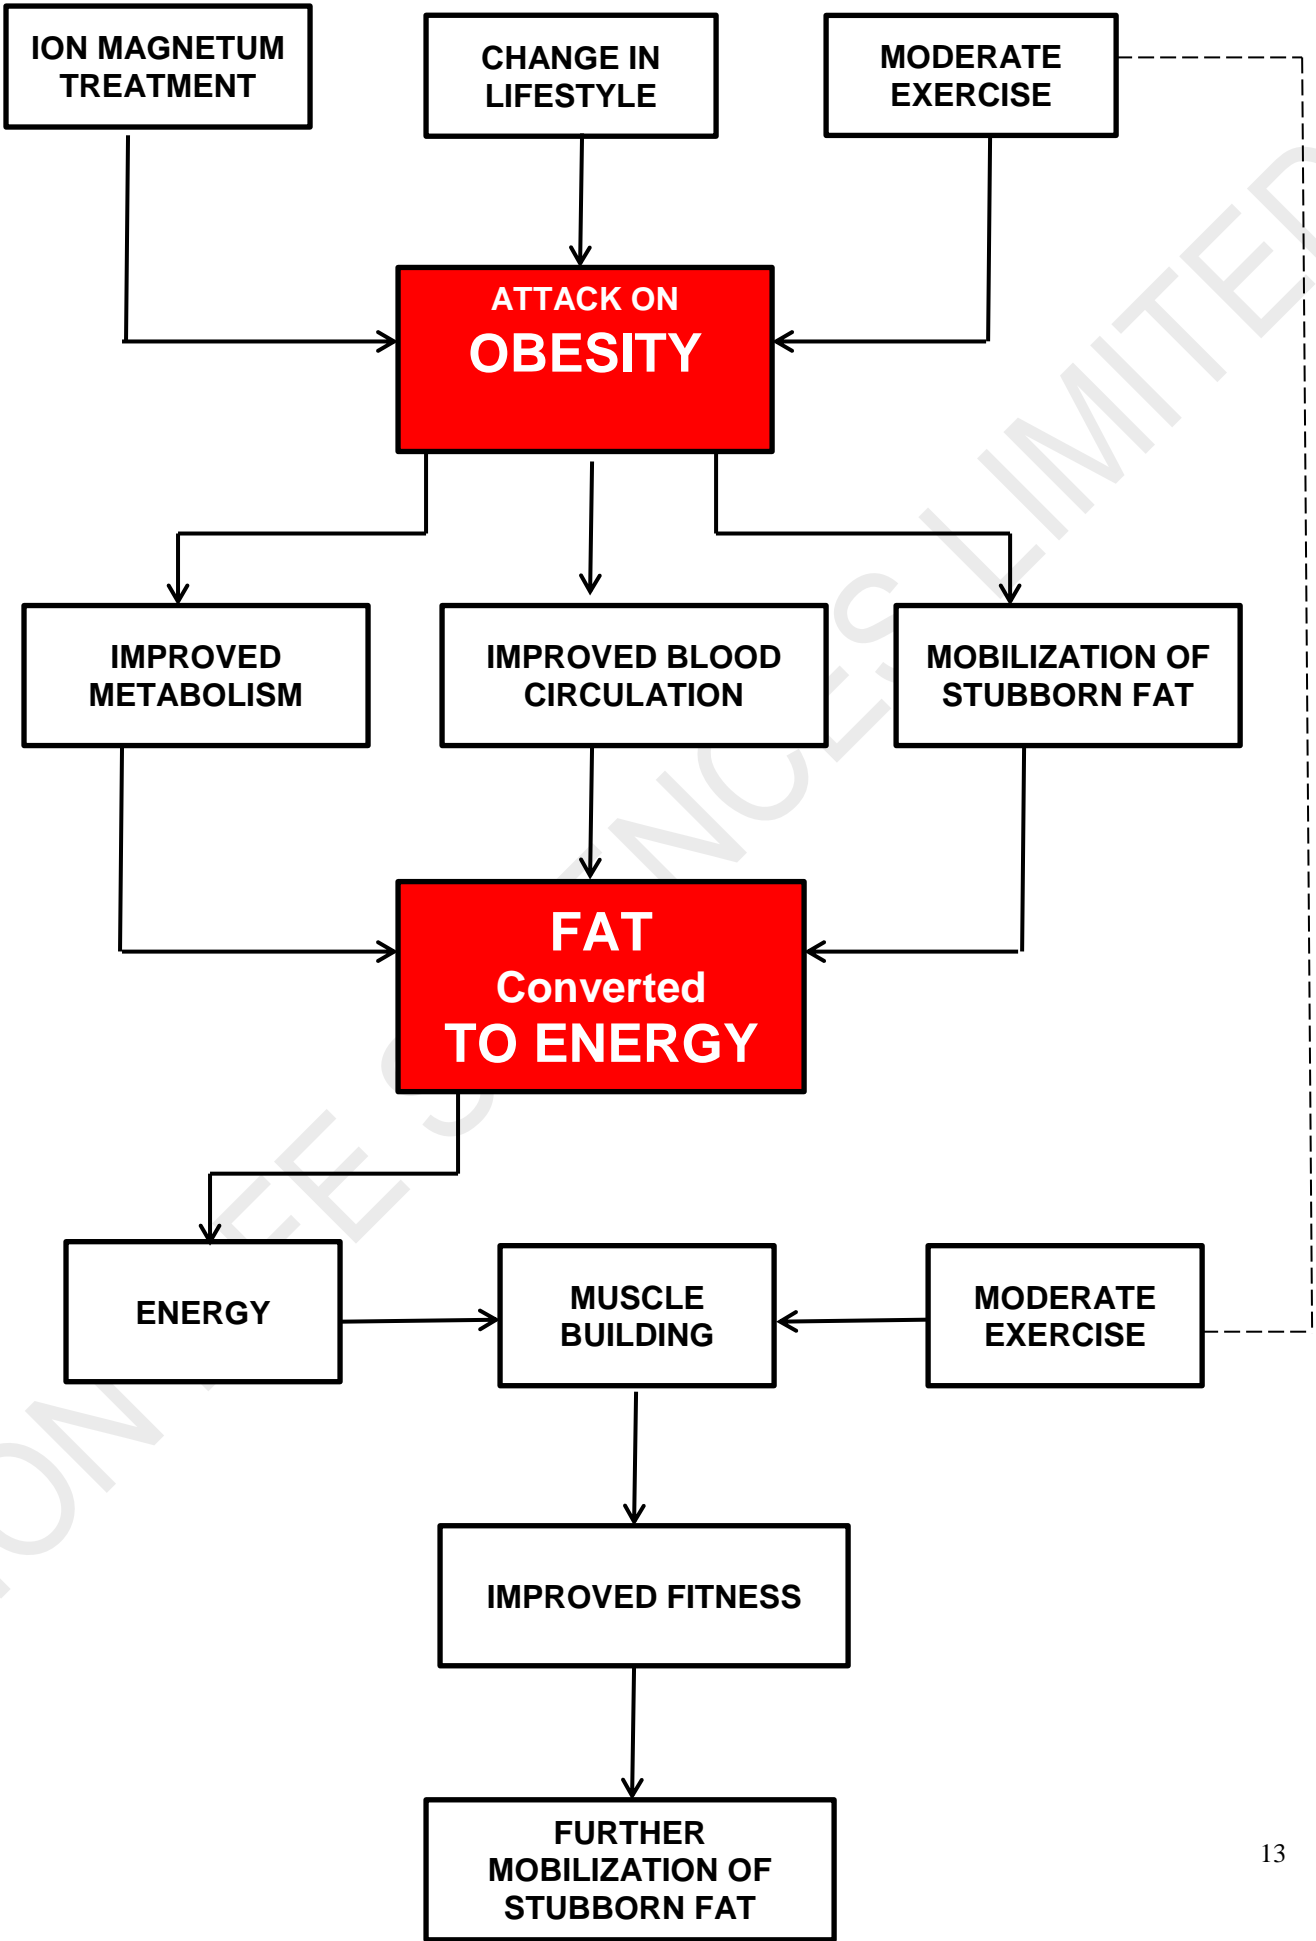

## FITNESS & NUTRITION GO HAND IN HAND

Alongwith application of ION MAGNETUM MACHINE attention should also be paid to have good NUTRITION (does not mean lot of eating) which can provide good nourishment to the body. Ensure that the food has low glycemic index and contains good nutrition. Also take care of GLYCEMIC LOAD. Avoid food with EMPTY CALORIES (alcohol is empty calories). Avoid junk foods. Do not over eat. Take foods which contains lot of fiber. Do not allow yourself to get constipated.

**YOUR BODY IS WHAT YOU PUT IN.**

# ION LIFE SCIENCES LIMITED

## CONVERTING FAT INTO ENERGY

The body is able to produce energy from fats by a process called lipolysis. This involves the break-down of fats by enzymes into glycerol and fatty acids. The resulting fatty acids are then released into the blood and are carried in the bloodstream to the liver. Once in the liver, the glycerol and fatty acids can be broken down further or converted into glucose by a multi-step process known as gluconeogenesis.

Long-distance swimming, rigorous workouts in gyms and other forms of endurance training utilize the body's fat stores as the most efficient form of muscle fuel. However in turn there will be release of LACTIC ACID at the same time, which will create inflammation and pain. There will be stress and damage to joints as well which is undesirable.

The application of complex waveform signals, generated by ION MAGNETUM MACHINE, to the muscles is interpreted by the brain as strenuous endurance building exercise, which results in mobilization of body's fat stores without the undesirable side effects like production of lactic acid and effecting the joints. Thus healing, muscle developing and body building process can be accelerated greatly by judicious integration of moderate exercise and ION MAGNETUM MACHINE. This also means athletes can build the muscles *in much lesser* time and that too without undesirable side effects.

## EFFECT OF ION MAGNETUM ON DIABET

**Diabetes is a condition of hyperglycemia or excessive blood glucose due to insulin resistance**

**Insulin is a treatment for Diabetes because insulin transmits glucose from the circulation to adipose cells, where glucose is stored**

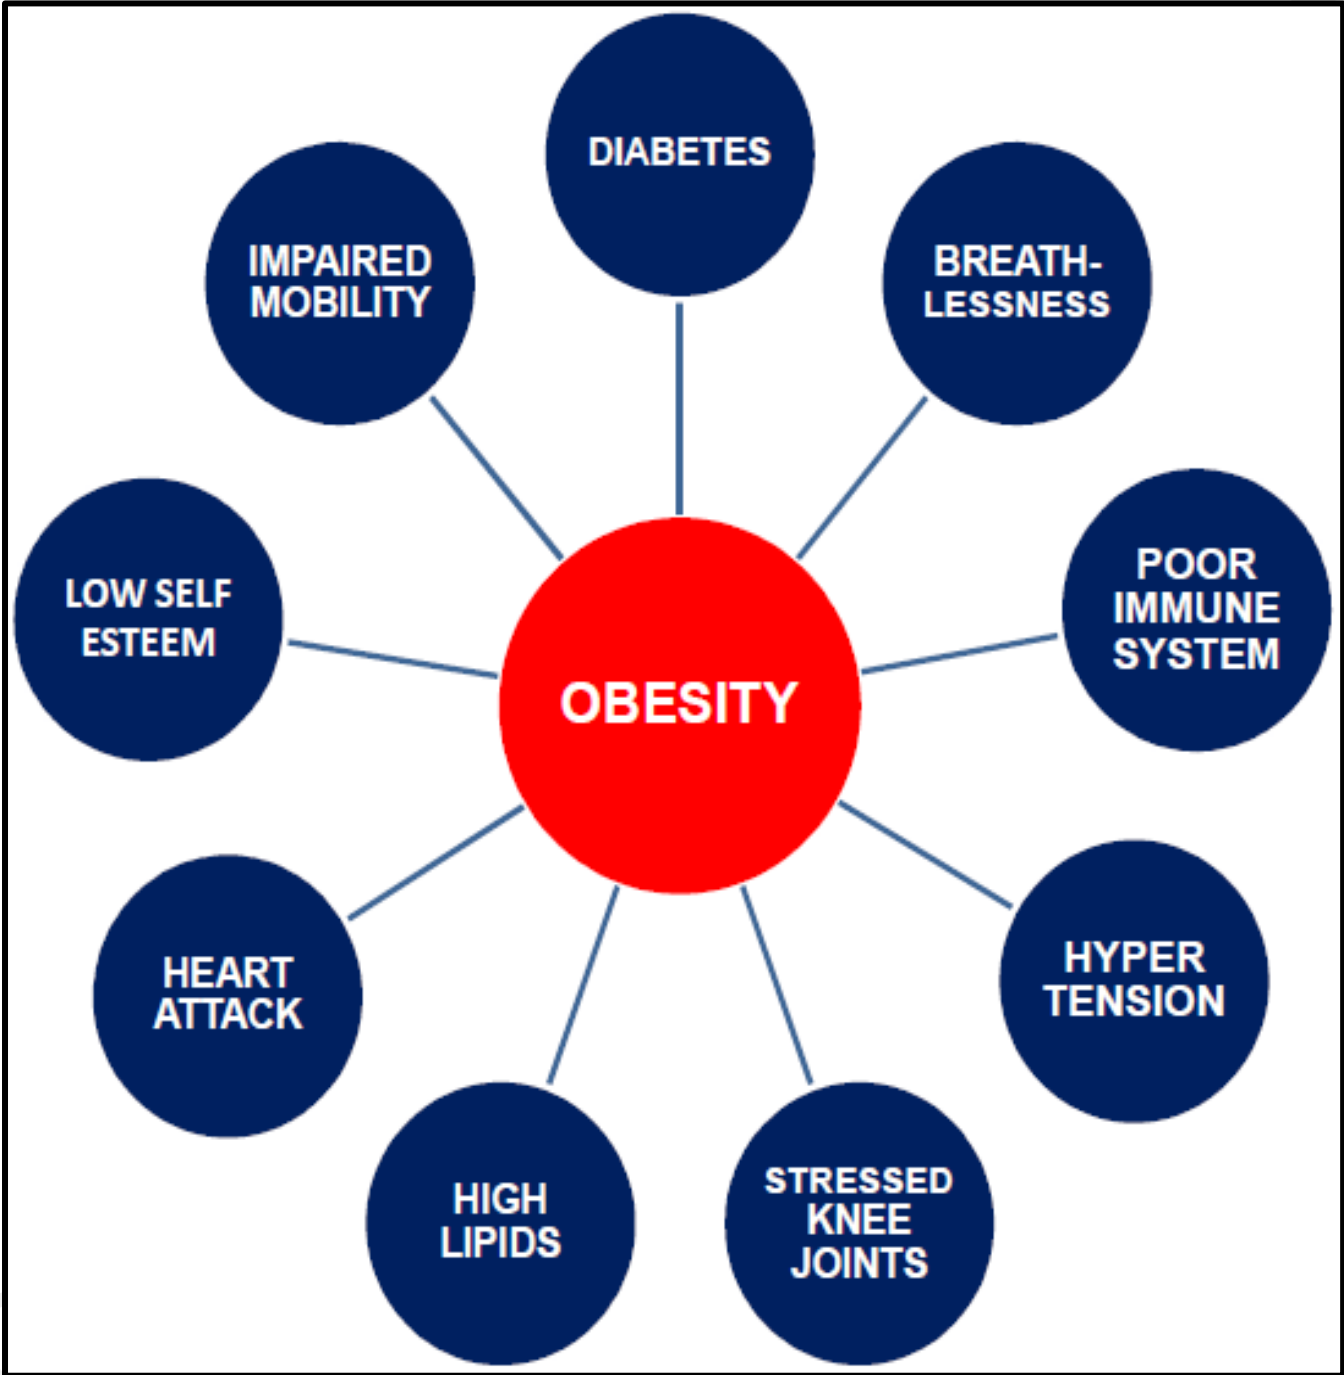

**Our hypothesis is that the special waveform device will cause the release of thyroid hormone (T3,T4) and growth hormone (HgH, IgF-I) as a result of delivering the signal of strenuous exercise to the motor nerves.**

**The thyroid hormone causes lipolysis**

**Glucose temporarily increases Diabetic symptoms**

**Growth hormone utilizes glucose for muscle hypertrophy, thus alleviating Diabetic symptoms**

## EFFECTS OF OBESITY

## SCIENCE

Close observation of the mechanism of cellular biology reveals the effect of EMR waveforms with nano currents in forming and sustaining life. Recent research has shown that it has profound effect at the cellular level, as important and as powerful as drugs themselves.

The concept of BODY ELECTRIC is known since long. However the effective applications were not realized until recently that modern electronics made available nano current procedures, the specificity and exactitude necessary for maximum effectiveness. This rapidly advancing science is based on the simple yet pervasive finding that all life producing and life sustaining processes are EMR. The critical components of cellular intelligence and life – the protein on the cells membrane, are generated by amino acids stringed together by their positive and negative charges. For instance, when the electrical charge of the protein is altered, the protein will change its shape due to Bio Electric Magnetic Resonant (EMR) waveforms as needed to accept nourishment or reject harmful elements. A specific channel type, sodium-potassium protein, called ATPase turns the cell into a constantly charging bio-battery.

According to Gestalt principal (coal ~ Diamonds) one arrangement of atoms may trigger aging; a different arrangement may enhance healing.

# ION LIFE SCIENCES LIMITED

During 1991 Nobel Lecture, Neher reported that biological membranes were shown to open and close in an all-or-none manner, forming square-wave patterns and postulated that “an improved technology would reveal a whole MICROCOSMOS of electrical signals in a multitude of electrically and chemically excitable cell types”. Since then, electro-physiologists and molecular biologists have researched avenues to identify the specifications necessary for a CLEAR signal that could artificially RESONATE the bioelectrical signals that cells emanate. The research resulted in identifying specific frequencies, specific EMR waveform patterns and nano currents to build a machine that can mimic it. The result is ION MAGNETUM MACHINE offered by ION LIFE SCIENCES LIMITED.

ION LIFE SCIENCES LIMITED has incorporated numerous bio EMR waveforms patterns. Each waveform pattern has numerous bio-frequencies. It has thousands of bio-frequency EMR waveforms which after inter-twining forms an analog square waveforms. Square waveforms act as carrier frequencies, to deliver Neuro-resonant frequencies in the shumann frequencies spectrum to body. Neuro-resonance signifies harmony between electronic and biological activity. Incidentally PACE MAKER is made using same technology employing one specific frequency and waveform.

## ION MAGNETUM

### TECHNOLOGY:

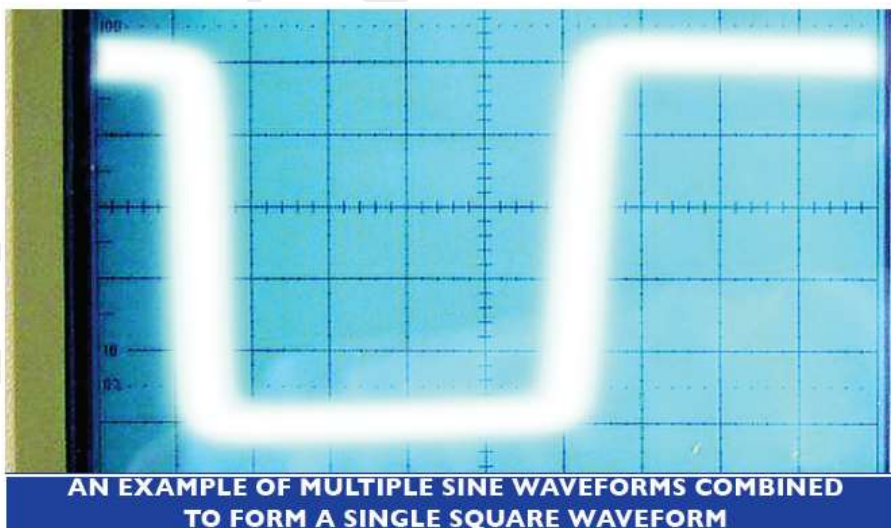

The ION MAGNETUM technology is NON INVASIVE.

The machine is built on the activity and role played by IONS in the body. Bio-Electro-Magnetic Resonance (EMR) waveforms.

- (1) Waveform Pattern Specific.
- (2) Frequency Specific.
- (3) Current Specific

Given the required amount of electrons, free radicals (molecules with missing electrons) can be instantly stabilized resulting in the healing. It is possible to electronically resonate the mathematical resultant of physiological energy, by composing a pure analog multi sine waveform that acts as a key to a lock with muscle neurons. Such waveform can act as reparative force in itself, as well as an electronic diplomat to awaken the activation of biological reparative mechanisms involved in extending longevity, muscle building, repairing distressed joints, reinforce immune system, increase stamina, speed up metabolism, detoxification, combating free radicals, controlling oxidative damage.

ION MAGNETUM is a device based on EMR waveforms to deliver **Pure Analog Multisine Waveforms**.

Till date, few devices have paid attention to waveform formation that is the essence of neuro communications. A digital square waveform is too simple

by itself to resonate the dynamic complexity of a biological system, the way one or two instruments played independently cannot form an orchestra. An orchestra involves many instruments playing together following a common rhythm. The body is a dynamic system composed of many parts interacting and functioning in harmony. If the signal causes disturbance in body's functions it would alert the body to treat the signal as an intruder. Hence a simple digital signal that most devices available in the market generate is ignored or is identified as an intruder by the body. A signal or a device will be accepted by the body provided that-

- It resonates with biological neuro-communications
- It has the complexity & flexibility to weave its way around the intricate organization of electrically excitable cells that compose the body.
- It participates with body's regular functions without disturbing them.

ION MAGNETUM'S complex signal composed of thousands of bio-spectrum waveforms, fulfills all these criteria, so it can enhance body building, core strength and stamina beyond the reach of any other technology.

### **ION MAGNETUM Effects on Blood**

Post ION MAGNETUM treatment blood samples show healthy blood cells which are uniform in size, colour, and shape and float freely in their own space; unlike unhealthy blood cells that are stuck together. Thus it separate red blood cells enhancing the transport of oxygen, nutrients, antibodies, hormones to sites of action, as well as waste products to kidneys.

EMR - Waveform helps to increase the secretion of endogenous hormones, specifically T4, T3 & Growth Hormone which in turn cause lipolysis and muscular hypertrophy.

It also increases secretion of Insulin Growth Factor-1 which helps to reduce insulin resistance, so helps controlling DIABETES.

# ION LIFE SCIENCES LIMITED

ION MAGNETUM bypasses aerobic (requiring oxygen) glucose burning as well as anaerobics (without oxygen) energy supply process that converts Pyruvic acid molecules to lactic acid.

ION MAGNETUM added to your training will blast your muscles to new growth. It will significantly increase your core strength, stamina and speed, while bursting through sticking points. ION MAGNETUM gives you what the competitors lack, the Hyperplasia and Hypertrophy you want in a fraction of the time required by a full professional workout.

## **Healthy Muscle Building:**

The ION MAGNETUM builds muscles using fat as its main energy source. It reinforces immune system, stamina, speeds up metabolism, detoxifies and enhances well-being. Hardly any Lactic Acid is produced, minimizing the workload of the lymphatic system. Oxidative damage and free radicals are the main cause of aging and diseases. ION MAGNETUM enhances and restores neuronal signaling, also acting as an antioxidant for combating oxidative damage by allowing a steady infusing of electrons that stabilize free radicals.

## **Healthy Joints:**

Usually the joints are distressed through exercise such as lifting or any repetitive motion. There is research evidence that micro-electrical stimulation producing EMR waveforms has successfully demonstrated healing of cartilage. It is also known that electrical energy can enhance osteogenic activity. However, electrical energy appears to lose its healing potential within the milliamp range (one over a thousand of an ampere), of the TENS machines, where ATP (cellular fuel) synthesis is significantly compromised. Concerns regarding the effect of a technology on joints usually comes from individuals who have experienced or have knowledge of muscle stimulators and TENS devices or other exercise systems which stress the joints. Because those devices do not help the joints, these individuals may have difficulty imagining the entirely different beneficial aspect of our technology to heal fractures, cartilage and joints. ION MAGNETUM revitalizes the joints how certain MENS (one over a millionth of an ampere) frequencies offer the required supply of protons necessary to spin the ATPase enzyme that synthesizes ATP (cellular energy). Biological energy is necessary to segregate and direct the proteins, enzymes, ionic currents and other recourses to battle the degenerated joint. Given the adequate EMR energy, the body has a reparative capacity to heal itself. Neuronal degeneration around the trauma, however, may compromise the speed and intensity of signals traveling via the nervous system to the brain,

# ION LIFE SCIENCES LIMITED

obstructing or interrupting the communication between nerves and brain. The less access the brain has to the neuron cells in the traumatized area, the greater the difficulty in directing biological agents necessary to heal the neuron, cartilage or joint. Here is how the ION MAGNETUM handmade analog waveform can substitute the weak or absent neuronal signals connecting the nerves surrounding the wound with the brain. Only the ION MAGNETUM multi-sine waveform has the clarity and communication capacity of a naturally occurring neuronal signal. Only the ION MAGNETUM waveform has decoded the intricacy of biological signatures that unlock the necessary biological gates.

This machine resonates the neurons firing during treatment resembling the way it happens during regular strenuous exercise, thus giving results comparable to those physical activities. The ION MAGNETUM waveform is composed of thousands of sinewaves of bio-frequencies. The ION MAGNETUM waveform is handmade and based on two decades of diligent research on neuron firing signals. It demonstrates clarity and communication capacity of naturally occurring neuronal signals. To date, few devices pay attention to waveform, incorporating bio-frequencies that is the essence of neuron communications. A simple square waveform or any other shape simple waveform is too impoverished itself to resonate the DYNAMIC COMPLEXITY of a biological system. The way a two piece team is insufficient in delivering the formations and overall performance necessary in the world cup. The signal of device will be unconditionally accepted by the body provided: -

- (1) It resonates biological neuron-communications
- (2) It has the inherent complexity and flexibility to follow the intricate spatial organization of electrically excitable cells in their biologically determined rhythm.

Above all, an electronic signal must participate with regular bodily functions while not disturbing them. Causing disturbance would alert the body to treat the signal as intruder, and would put the body in a state of war to reject the intruder. ION MAGNETUM analog, multi-sine waveform is carefully designed to fulfill biological requirements, making it eligible to be accepted by the body to enhance body building, core strength, agility, and stamina.

**LIPOLYSIS v/s ION MAGNETUM**

**Lipolysis does not reduce visceral fat accumulated in the body, whereas ION MAGNETUM can remove it.**

**For DIABETES prevention and control, removal of Visceral Fat helps tremendously.**

## DETOXIFICATION

Muscle contraction requires energy that is attained by burning surrounding fat cells. According to research, adding a few extra pounds of lean muscle can increase metabolic rate by up to 200 calories a day. This is the reason why some individuals may notice that they look slimmer a few days after each ION MAGNETUM procedure. ION MAGNETUM is a catalyst for intensive **lymphatic drainage** or detoxification that occurs as a result of the muscle contractions and the inevitable burning of fat cells. Blood and lymphatic circulation is restricted by enlarged fat cells. The deflated fat cells following an ION MAGNETUM treatment allow the normal flow of lymphatic and blood circulation. This ultimately helps cellulite reduction.

## THE LYMPH SYSTEM

The LYMPH System is part of body's immune system and helps fight infection. LYMPH itself is a clear, slightly yellow fluid. It transports nutrients and oxygen to cells, **COLLECTING TOXINS** on the way and flushing them out through the lymph nodes. You have around twice as many lymph vessels as blood vessels in your body. However, unlike blood, which is pumped around by your heart, the lymph system has no pump. The pressure from your blood vessels and movement from your muscles push the lymphatic fluid around. The lymph is moved through the body in its own vessels making a one-way journey from the interstitial spaces to the subclavian veins at the base of the neck. The muscle movements produced by ION MAGNETUM procedure achieves this at accelerated rate.

## DETOXIFICATION INFORMATION

Even after the first Ion Magnetum treatment the body begins to clean house. It starts to liquefy accumulated waste and toxins that may have been stored in the tissues for a prolonged period of time. Some individuals will go through this process without noticeable changes, especially if they drink at least 8 glasses of water a day. But genetics have given each one of us a unique make up that make us react differently to biological processes like detoxification. Most will experience frequent urination and more frequent bowel movements. Others may experience mild headaches and some nausea. It is important to go through this process of detoxification which may last from 1-3 days on the average. After the slight discomfort during the period of detoxification, you will experience a new level of vitality. This process of detoxification is termed a “healing crisis” which is a sudden and acute reaction of strengthening of the body’s energy so that old toxins can be eliminated. The characteristics of a “healing crisis,” are very different from those of a “disease crisis.” It is important to know this difference to appreciate the fact that not all “crisis” is “bad.” Sometimes feeling slight discomfort for a short duration is necessary to elevate you to a higher level of wellbeing.

<b>DISEASE CRISIS</b>	<b>HEALING CRISIS</b>
A disease crisis starts gradually and is developed over a period of time.	A healing crisis starts suddenly, after feelings of perfect health.
A disease crisis often involves inadequate elimination.	A healing crisis is accompanied by increased elimination.
After a disease crisis, there is usually a period of convalescence.	After a healing crisis the condition improves very quickly.
After the crisis is over, the individual feels worse.	After the crisis is over, the individual feels rejuvenated

ION LIFE

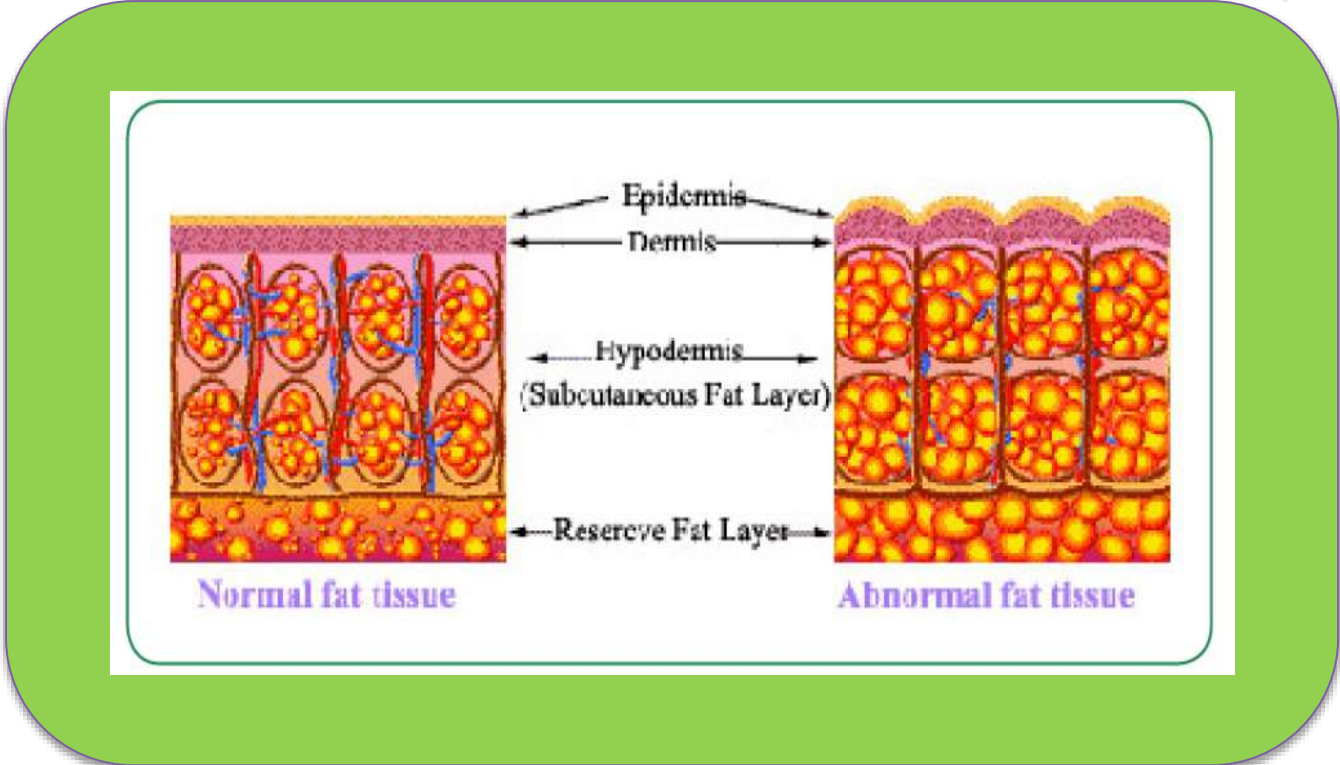

## CELLULITE

Cellulite is the dimpling pattern on skin caused by lobules of underlying adipose tissue. Cellulite is not a medical or scientific term, but refers only to aesthetics. Cellulite occurs mostly on the hips, thighs and buttocks. Women get cellulite more often than men, probably because adipose tissue lies more closely to the skin in women. Cellulite is not related to being overweight. Average and underweight people also get cellulite. Doctors have identified a number of causes for cellulite:

• Insufficient water intake	• No exercise
• Constipation and digestion problems	• Tension and stress
• Pollution	• Incorrect breathing
• Fatigue	• Poor eating habits
• Estrogen	• Poor circulation

All muscles in the body are covered with a padding of fatty, connective tissue, which varies in thickness, and is surrounded by a liquid – supplying this “covering” with nourishing and removing waste products. This fatty tissue is held in place by a network of fibers, and when the system works well, all waste products are removed from this system – resulting in smooth body curves. When the waste removal system starts to fail, waste products start building up, and the connective tissue becomes saturated with liquid which then thickens and hardens – forming hard pockets that puff up to produce the “orange peel” or “cottage cheese” effect. In the dermis and hypodermis, fat cells store the triglycerides (fatty contents) absorbed through meals. Fat cells are spread all over the body and accumulate in certain areas. This storage is made in preparation of starvation periods. As starvation periods are rare, the body stocks triglycerides in excess and we gain weight. Fat cells increase in size and number and create cellulite.

Cellulite is decreased as a result of any process that utilizes energy by burning the surrounding fat cells and triglycerides. Such process prevents weight increase or new cellulite formation. Cellulite may also decrease as a result of increased blood circulation in the affected areas that results in returning the connective tissue to normal elasticity after loosening the trapped waste materials. The elimination of waste materials from the affected areas by vigorously enhancing lymphatic drainage is an additional process that results in an overall reduction of cellulite.

ION LIFE

## MUSCLE STIMULATOR EFFECTS

- Depolarizes the muscle, producing a painful twitch
- Signal is dissonant with biological signals
- No signal spread, signal is only effective in the particular area targeted
- No evidence of metabolic rate increase
- No evidence of tackling Visceral FAT
- No evidence of speeding up fat burning in areas other than the ones targeted

# ION LIFE SCIENCES LIMITED

## ION MAGNETUM v/s EMS DEVICES

**EMS DEVICES**

Uses high intensity current / TENS

Stimulates muscle tissue

TENS depletes ATP (cellular fuel for overall optimum functioning)

Pair of pads (positive negative) must be placed around the muscle and close to each other otherwise they give a painful sensation without a contraction

**ION Magnetum**

Uses micro-current / MENS

Signals the nerve

Does not deplete ATP (cellular fuel for overall optimum functioning)

The further apart the positive and negative pads are from each other, the more comfortable the experience. The contraction feels natural as if you are actually exercising.

# ION LIFE SCIENCES LIMITED

ION MAGNETUM	OTHER DEVICES
Signals the Nerve	Stimulates Muscle tissue.
Does not deplete ATP (cellular fuel for overall optimum functioning)	Depletes ATP
The contraction of muscle feels natural as if you are actually exercising	Giving jerks to muscles.
Thousands of resonant bio-waveforms to create virtual exercise effect	No bio-waveform.
Signal is resonant with biological signals of body. The body will feel energetic after treatment.	Signal is dissonant with biological signal. This will cause stress and fatigue in the body.
Increase in metabolic rate	No increase in metabolic rate.
Permanent Fat Loss. ***	No Fat Loss.
Tackles visceral FAT.	Does not tackle visceral fat.
Overall fat burning.	No Fat Burning
Signal is spread (resonated) across the body.	No signal spread. Only effective in the local area.
Combats Free Radicals	Possibility of increasing free radicals.
Reparative force involved in extending longevity and muscle building	No repairs and not muscle building
Repairs distressed joints	Does not repair distressed joints.
Detoxifies	Produce Toxins
Increase core strength	Depletes core strength
Increase secretion of Insulin Growth Factor-1 which helps to reduce insulin resistance, so helps controlling DIABETES.	Does not help in Diabetes Control.

Read more about the ION POWER in SCIENCE section to know about the uniqueness of this technology and what are the possibilities offered by this technology.

THE TEST OF THE PUDDING IS IN EATING IT.

## USES OF ION MAGNETUM

- To speed-up muscle building.
- To prevent muscle atrophy in case of non-use of muscles for long periods.
- To treat obesity
- To mobilize visceral fat
- Normalize your metabolism – the best way to lose weight and keep it off.
- To improve blood circulation.
- To reinforce immune system
- To enhance stamina
- To increase agility
- To tackle metabolic disorders
- To detoxify
- To rejuvenate the body
- To treat varicose – veins
- To open clogged arteries, to bypass the need of STENTS.
- For treating back pain
- For glycemic control
- To improve the core strength of the spine
- To revive body's own mechanism to fight diseases, revive, regenerate,
- To regulate breathing
- To remove muscle cramps, swelling, inflammation due to workout
- For recovery from high impact workout like jogging, running, body building, competitive sports. The therapy works as REGENERATIVE MEDICINE.
- For fitness, for impact programming, stamina, flexibility weight training, body building.
- Strengthening the joints to avoid replacements.
- Preparing the muscles before knee joint replacement.
- Improve your mood level, staving off anxiety and depression.
- Resist yearly cold and flu.
- Return to normal sound sleep.
- Gain more energy and resist chronic stress.
- Get rid of persistent aches and pains.
- Relieve your body of a wide range of discomforts.
- Slow the aging process.
- Decrease your risk of cancer.

## USERS OF ION MAGNETUM

**ION MAGNETUM technology is NON INVASIVE and is used by:-**

- **Sports Medicine Professionals for Muscle Building & Training Injuries.**
- **Anti-aging doctors treating athletics and Body Builders.**
- **Medspas offering treatments to women and men with visceral fat.**
- **Health clubs and physical trainers to enhance Hyperplasia and Hypertrophy.**
- **HOSPITALS for simulating exercise effect on immobilized patients to prevent muscle atrophy & tackle metabolism, tackle inflammation, for relieving stress and trauma.**
